Social Security Wage Base Increase for 2014

The Social Security wage base, the amount of an employee's salary (after applicable pre-tax deductions) that can be taxed for Social Security purposes, has risen from $113,700 in 2013 to $117,000 in 2014. This means that the first $117,000 of an employee's taxable wages is subject to Social Security deductions.

An employee's entire taxable salary is subject to Medicare deductions.

- For Social Security – You and SHU each pay 6.2% on taxable compensation up to $117,000.
- For Medicare – We withhold 1.45% on taxable compensation up to $200,000 and 2.35% on SHU taxable wages beyond $200,000. SHU pays 1.45% on all taxable compensation paid to you.

Employees can go to www.socialsecurity.gov/onlineservices and click on "Get Your Social Security Statement" to obtain a statement of their earnings and an estimate of future benefits. Individuals over age 60 who are not receiving Social Security benefits automatically receive a paper statement from Social Security annually.
