

IEEE NPSS Young Professionals Symposium

Tue. May 23rd, Starting at 6:30 pm
Wildwood 5

6:30 pm - 7:00 pm

Opening keynote speech by Dr. Andrew Zwicker, head of Communications, Science Education, and Public Outreach at Princeton Plasma Physics Laboratory, and member of the New Jersey General Assembly representing the 16th Legislative District. Dr. Zwicker will be speaking with the audience about "The Physics of Politics".

7:00 pm - 8:00 pm

Student and young professionals poster presentations

Buffet style light dinner and drinks will be served during the event.

The purpose of the poster symposium is to help initiate and enhance interactions among young professionals and potential employers. All students and young researchers (defined as less than 15 years after the completion of their Bachelors degree) who submit an abstract to ICOPS 2017 are invited to present in this poster symposium.

Attendance of the event is open to all ICOPS attendees, and potential employers are especially welcome. Currently representatives from 9 laboratories, companies, and universities (listed below) have indicated that they will have representatives present to meet with students and young researchers to talk about work and research areas at their institutions. **The presenters are encouraged to bring a CV with them so that it is available if requested.** We hope to see you there!
