

## **Hearing Disability VERIFICATION FORM**

Each student requesting accommodations through the office of Disability Support Services is required to submit documentation to verify eligibility under Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Amendments Act (2008). As defined by Section 504 and the ADA, an individual with a disability is a person who has a physical or mental impairment which substantially limits a major life activity. Academic adjustments and other accommodations are implemented to provide equal access to college programs and services.

In order to determine eligibility, a qualified professional must certify that the student has been diagnosed with a disability and provide evidence that it represents a substantial impact to a major life activity (e.g., caring for oneself, performing manual tasks, seeing, hearing, eating, sleeping, walking, standing, lifting, bending, speaking, breathing, learning, reading, concentrating, thinking, communicating, working, etc.). It is important to understand that a diagnosis in and of itself does not substantiate a disability. In other words, information sufficient to render a diagnosis might not be adequate to determine that an individual is substantially impaired in a major life activity. DSS requests documentation of a disability for the purpose of establishing disability status, understanding how the disability may impact a student, and providing adequate information on the functional impact of the disability so that effective reasonable accommodations can be determined. Reasonable accommodations are individually determined based upon the information provided by the student in the intake interview and the functional impact of the condition as evidenced by supporting documentation. Prior history of having received an accommodation does not, in and of itself, warrant or guarantee its continued provision. An Individualized Education Plan (IEP) or 504 plan is almost never sufficient documentation of a disability at the post-secondary level.

This documentation form was developed as an alternative to a traditional diagnostic report. If a traditional diagnostic report is being submitted as documentation instead of this form, please refer to the DSS website (<http://www.shu.edu/offices/disability-support-services/forms.cfm>) in order to view documentation guidelines. DSS expects the following in regard to this documentation form:

- The form will be completed with as much detail as possible as a partially completed form or limited responses may hinder the eligibility process.
- The diagnosis of a sensory impairment was derived through a formal assessment.
- The assessment information must be current.
- The form is being completed by an appropriate professional, with training and expertise related to the particular condition identified, such as a licensed audiologist, certified by the American Speech Language Hearing Association, or a licensed medical doctor with certification in otology or otolaryngology. The professional may not be a relative of this student.
