

Launch a Great Future in Computer Science

Great minds in computer science are needed more than ever. That's because careers in software development, cybersecurity and data science are expected to grow as much as 30% by 2026, according to the Bureau of Labor Statistics.

At Seton Hall, you'll take cutting-edge classes and learn from renowned scholars. Many of our faculty members are experts in topics like robotics, symbolic computation, data visualization and analysis, technology applications and small-device programming. Starting your freshman year, you'll have the opportunity to conduct research alongside faculty and attend professional conferences throughout the country. For example, students recently presented their research at the Undergraduate Research Conference at MIT. There are also opportunities to have your work published in professional journals.

In addition, you can learn in-demand coding skills during summer boot camps and further boost your credentials by earning a Cybersecurity Certificate.

All this adds up to 100% of our computer science students finding employment after graduation in fields like software development, data science, finance and more. Others continue their education at top graduate schools like Stanford, UConn, Emory University, University of Southern California and Stevens Institute of Technology.

With opportunities like these, great minds like you can accomplish anything in computer science.

"I've done some great things at Seton Hall including tour Google's massive and vibrant New York City office, as well as participate in a stimulating question and answer session with some of Google's brilliant engineers. I also had the privilege of working alongside faculty on an exciting research project, [which includes] a research paper under review for publication. My professors have been a great support system and are passionate about providing me with engaging experiences in my field while equipping me with a solid academic foundation to launch my dream career."

Hands-On Learning

At Seton Hall, you'll develop your skills and résumé — with countless hands-on learning opportunities. You can produce shows in our state-of-the-art television studio, work on cutting-edge research with your professors or start developing your own product idea. Many of our students also gain real-world experience by studying and interning in places like China, India and Portugal. Others write for our award-winning newspaper, The Setonian, or produce a show for our #1 ranked college radio station in the country, WSOU, or track public opinion at the Seton Hall Sports Polling Center. In and out of the classroom, great minds keep learning.

Internships and Career Opportunities

Here, you'll get a head start on a great career. We offer extensive career services few schools can rival. A dedicated career adviser will start working with you freshman year, and you can take advantage of more than 17,000 internship opportunities from a school ranked #4 in the nation for providing internships. It's why we have a 92% employment rate and our graduate mid-career earnings are 50% higher than the national average. Of our internship providers, 98% say they would hire our graduates if they had an opening — because they know when they hire a Seton Hall graduate, they're getting the best talent in the field.

Our students intern at companies including:

Lincoln Financial Major League Baseball MetLife New Jersey Devils Prudential UPS
U.S. Department of Justice

Location, Location, Location

Launch your future in a great location. Seton Hall is nestled in South Orange, New Jersey, a quaint college town surrounded by an endless array of opportunities. From campus, you can walk to the train station and be in Manhattan in just 30 minutes, where you're truly in the center of everything. Whether for work or play, food or fun, NYC has it all. The unprecedented access to opportunities for networking, career development and jobs will help you blaze a trail like only a great mind can do.
