

# American College of Healthcare Executives and the Seton Hall Masters of Healthcare Administration Domains

## Introduction

The healthcare industry is very volatile and everchanging, just turn on the TV or Radio and you can see “healthcare” as a topic of discussion for everyone. The ACHE congress in Chicago, IL was no different in 2018. With healthcare leaders, physicians, and students from all over the country it was a tremendous experience seeing everyone have various thoughts and ideas about the healthcare industry. The most important take away was that all schools had similar teaching curriculums and thought processes.

## Goal

To showcase the similarities between the MHA program, the ACHE Congress and the healthcare agendas in the United States

## MHA Domains

## DOMAIN 1 – Leadership in the Healthcare Environment

**DOMAIN 2 – Critical Thinking in a Complex and Competitive Environment**

**DOMAIN 3 – Management in the Healthcare Environment**

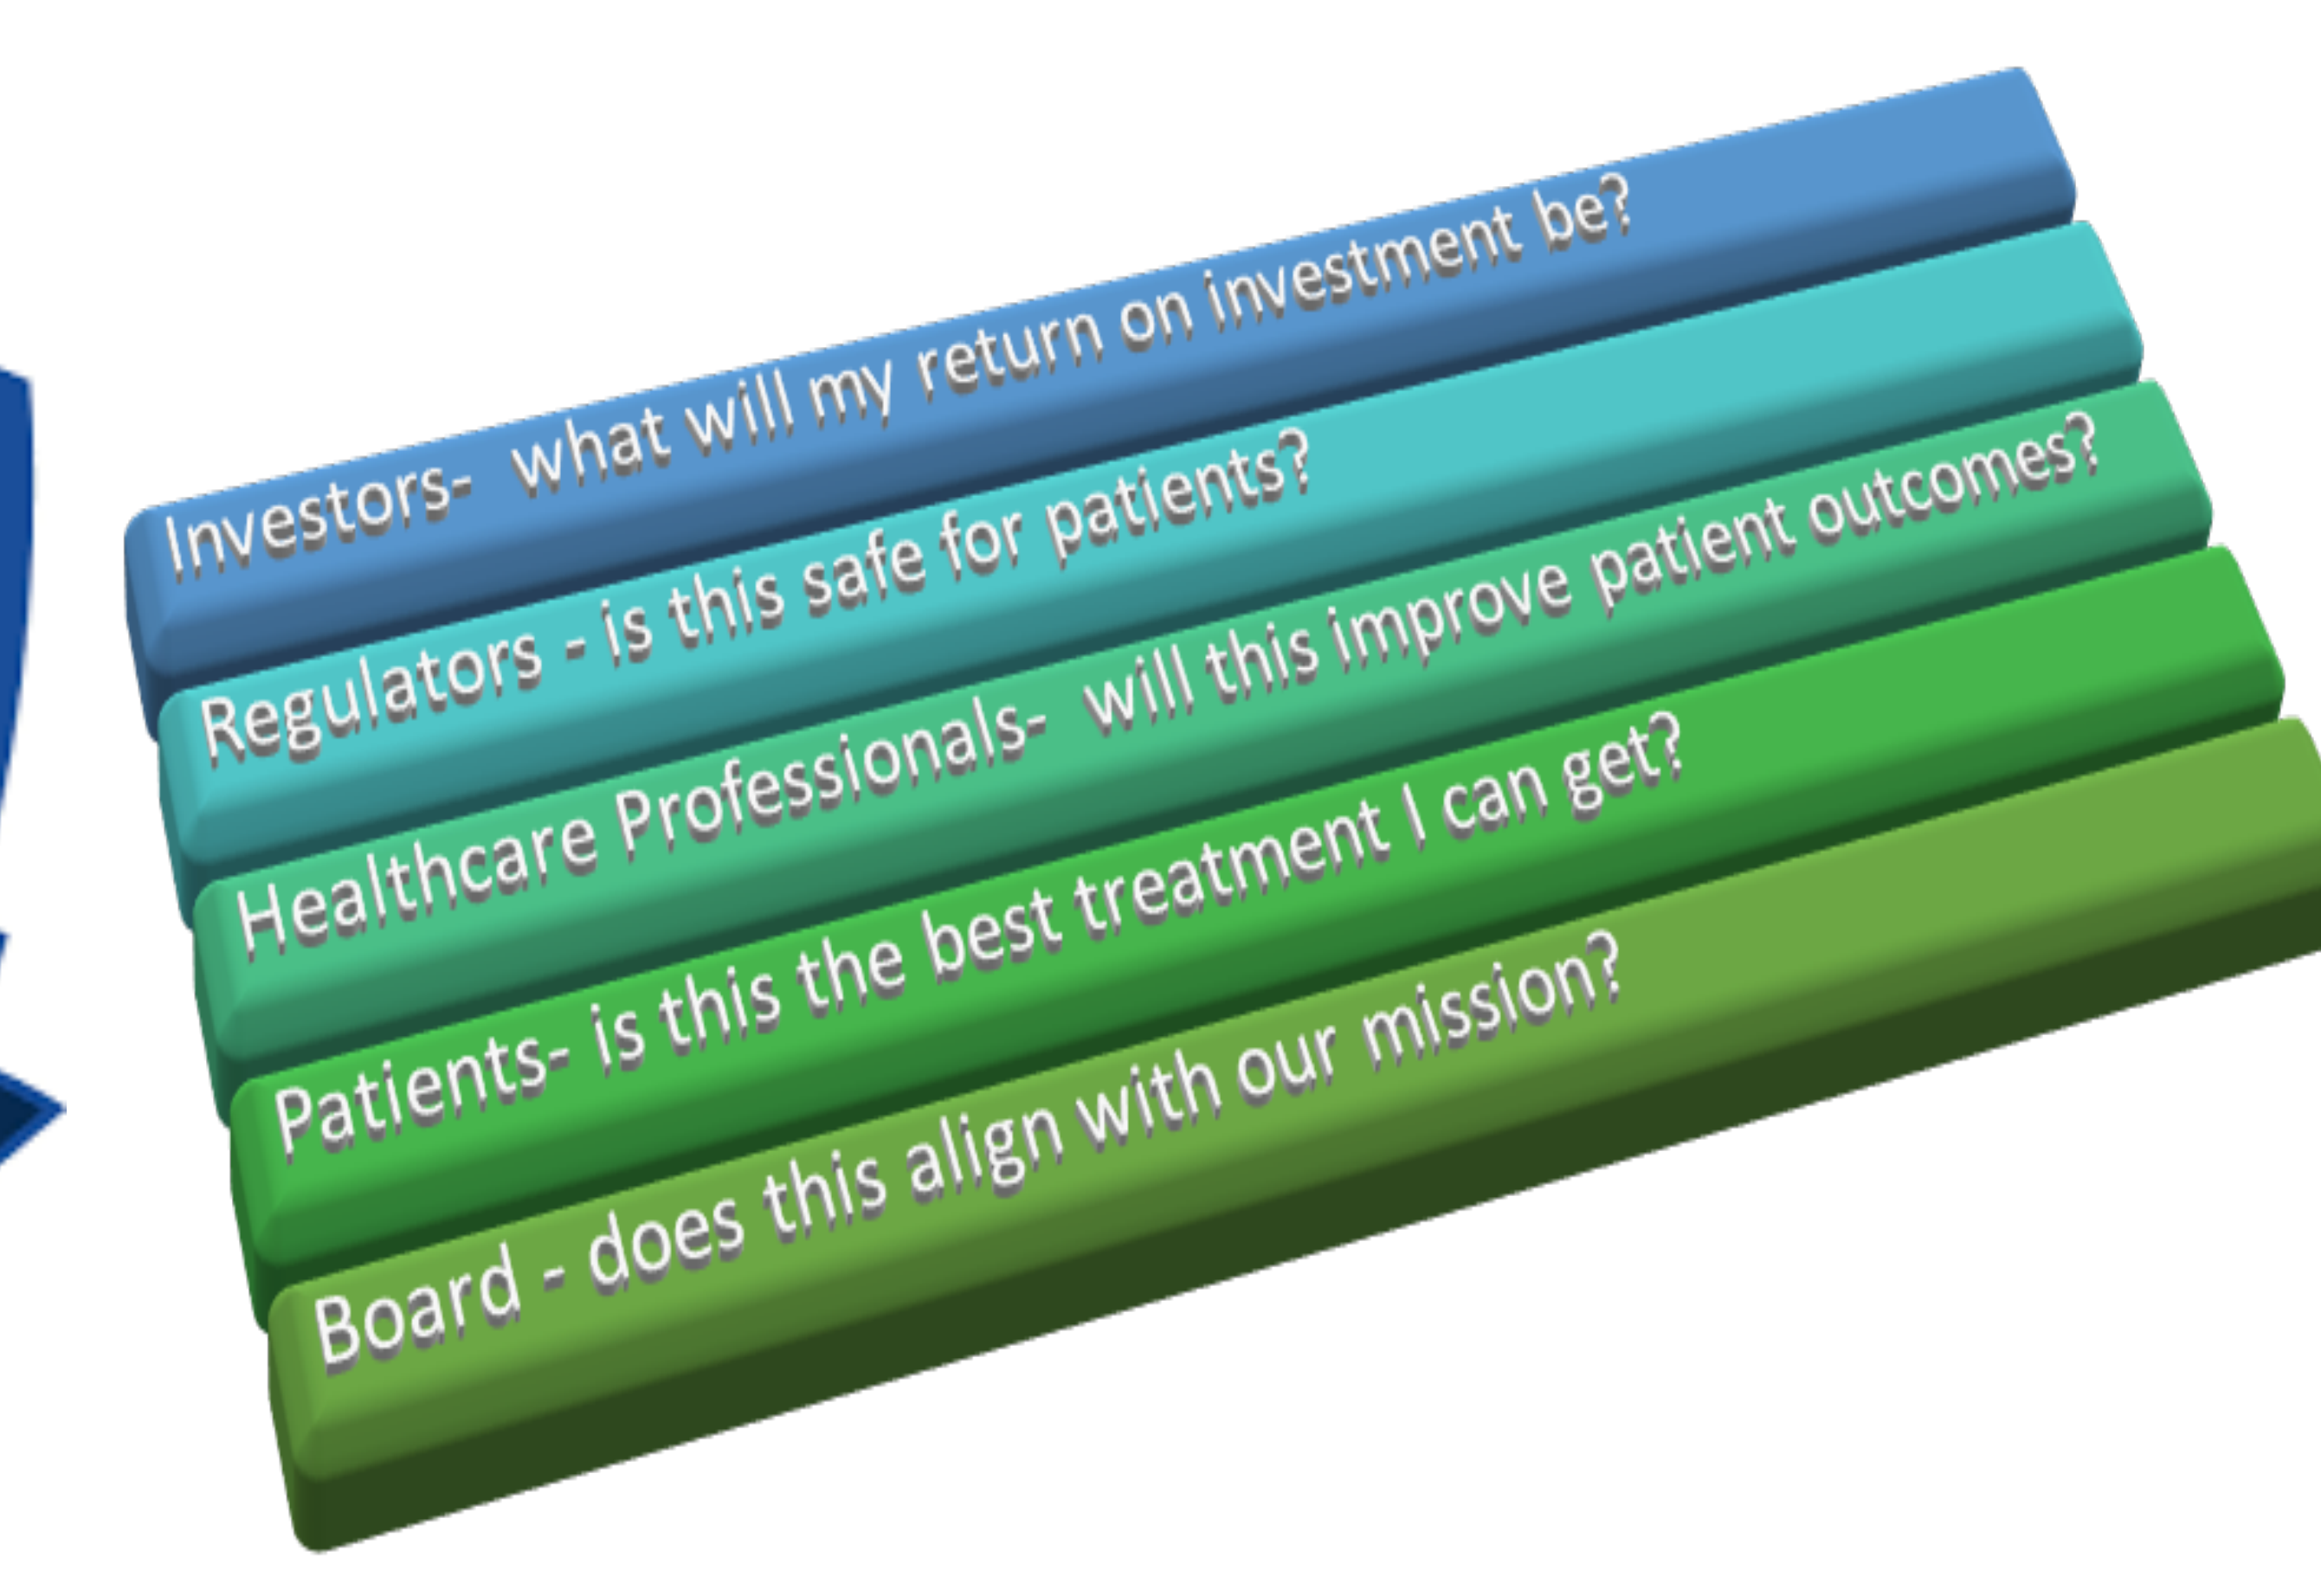

**DOMAIN 4 – Political and Community Development within the Healthcare Environment**

**DOMAIN 5 – Communication**

**DOMAIN 6 – Professionalism and Ethics**

Kashif Khan 1 MHA Candidate 2018

American College of  
Healthcare Executives  
*for leaders who care®*

## Communication

## Healthcare Management

There are different styles of management that help coincide with the MHA domain, the two most pertinent of these are the Top-down or Bottom-Up approaches. In a seminar at the ACHE Congress both were emphasized and each has its pros and cons. The more innovative and readily used style that increasingly more healthcare systems are using is the “bottom-up” approach. This is because this allows the levels of the organization to become a part of the process and helps make everyone feel at large. This can cause huge cultural shifts in the right direction which can help a healthcare system succeed.
