

Your generosity opens doors

This scholarship has made a very positive impact on my experience here at Seton Hall University. The extra support has allowed me to take a step back from working nonstop and put an extra emphasis on my school work and getting involved in more events around campus.

Sarah Lobo

Class of 2024

Hometown: Butler, New Jersey

Major: Finance and Marketing

Pirate Blue Endowed Scholarship

The Seton Hall Experience: A Seton Hall University educational experience has to do with its exceptional community. Students are able to connect with their professors to help secure internships or jobs, join various clubs and organizations, and obtain a well-rounded education.

Academic Pursuit: I chose to study finance and marketing after completing a few business courses in high school. These courses made me realize that I have a passion for looking into the financials of a company and knew this is what I wanted my future career to look like.

Success Defined: After I graduate from Seton Hall University, "success" to me is securing a full-time job in the business field and having the ability to use what I learn in my courses and apply the knowledge to the real world.

Memory Lane: My favorite memory at Seton Hall University thus far is gathering around the Christmas tree during finals week with all my friends and watching the tree lighting. This was a moment where I was able to take a step back and realize why I am so happy I chose to go to Seton Hall University.
